(54) Title: DISASTER PREVENTING SYSTEM USING DIGITAL RADIO COMMUNICATION

(57) Abstract: A disaster prevention system using a wireless digital communication is disclosed. The object of the present invention is capable of outputting a fire alarm when a fire occurs, displaying a location of the fire, and also driving an initial fire fighting device installed at the location of the fire so that the fire can be rapidly suppressed while still in its initial stage. It is another object of the present invention to provide a disaster prevention system using wireless communication capable of providing convenience of construction and reducing construction costs. It is a further object of the present invention to provide a disaster prevention system using wireless communication capable of stably operating even if an external AC power source is not supplied thereto. It is yet another object of the present invention to provide a disaster prevention system using wireless communication capable of automatically and rapidly calling corresponding office and corresponding office and corresponding manager when a fire occurs.
